

Assignment 1 - MSS Product Vision Board**Student ID: 35844851****Student Name: Vaasu Goyal****MSS PRODUCT VISION BOARD**

VISION STATEMENT (Brief):		To give every expectant mother in Perth, Rockingham and Mandurah — including those in remote, Aboriginal and CALD communities - safe, timely access to maternity care from home, by connecting pathology, imaging, pharmacy and telehealth services on one secure digital platform.					
	TARGET GROUP: Expectant mothers across the three MSI regions (including remote, Aboriginal, and CALD communities); allied health staff (midwives, obstetricians, radiologists, pathologists, pharmacists, telehealth providers); hospital administration staff; MSI leadership and WA Health stakeholders.		NEEDS: Reduce travel burden for maternity care; equitable access to specialist services for regional/remote and culturally diverse patients; a single connected system instead of fragmented pathology/imaging/pharmacy/telehealth workflows; simplified scheduling and billing for administrative staff; secure, compliant handling of sensitive patient data		PRODUCT: A cloud-based (SaaS) clinical information system with core features: (1) telehealth/remote consultations, (2) appointment scheduling, (3) billing and claims processing, (4) health data analytics, (5) pathology/imaging/pharmacy information exchange, (6) secure patient data management aligned with privacy regulations		BUSINESS GOALS: Establish MSI as a leading maternity health-tech provider in WA; open a new SaaS revenue stream; strengthen alignment with WA Health / WA Country Health Service strategic priorities on equitable regional access; build a foundation for expansion into other Australian markets if the pilot succeeds.
